Name: Sheik Noordeen
Roll no.: 240701494

UID EXPERIMENT 10

- **AIM:**
- The aim is to create interactive data visualizations, such as bar charts and doughnut charts, for an inventory management system using JavaScript.

PROCEDURE:

Step 1: Set up the HTML file to create the basic structure of the webpage. Include canvas elements to display the inventory charts.
Step 2: Add required libraries (like Chart.js) using CDN in the HTML file to enable drawing capabilities.
Step 3: Create a JavaScript file (script.js) to store inventory data such as product names, stock levels, and categories.
Step 4: Use JavaScript to generate a bar chart showing current stock levels for different products.
Step 5: Create a doughnut chart to represent the distribution of inventory across various categories.
Step 6: Link the JavaScript file to the HTML file and run the program in a browser.

html.html > html

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Inventory</title>
</head>
<body>

    <h1>Inventory Management</h1>

    <canvas id="pieChart"></canvas>
    <canvas id="barChart"></canvas>

    <!-- Chart.js MUST come first -->
    <script src="https://cdn.jsdelivr.net/npm/chart.js"></script>

    <!-- Your JS file -->
    <script src="ja.js"></script>

</body>
</html>
```

JS ja.js > ...

```javascript
const inventoryData = {
    labels: ['Electronics', 'Clothing', 'Home Appliances', 'Books', 'Toys'],
    datasets: [{
        label: 'Items in Stock',
        data: [200, 150, 100, 80, 50],
        backgroundColor: [
            'red',
            'blue',
            'yellow',
            'green',
            'purple'
        ]
    }]
};

// Wait until page loads
window.onload = function () {

    const pie = document.getElementById('pieChart');
    const bar = document.getElementById('barChart');

    new Chart(pie, {
        type: 'pie',
        data: inventoryData
    });

    new Chart(bar, {
        type: 'bar',
```

OUTPUT:
