USER INTERFACE AND DESIGN

COMAPARSION OF UI DESIGN BETWEEN TWO FIGMA CREATION

BAD WEBSITE:

GOOD WEBSITE:

PROTOTYPE LINK:

https://www.figma.com/proto/OWzq8X2nRWFSIKfFSfgpSs/GOOD-WEBSITE?t=u6KpncJgRWlQMuGW-1

The two websites have distinct designs and approaches. Here's a comparison:

BAD WEBSITE

1. Design Style:

o Simple and minimalistic layout with a three-column structure.
o Focuses on displaying multiple cake varieties at once using large product images.
o Uses strong and contrasting background colors (red, blue, dark brown) for different cakes, which can be visually overwhelming.

2. Content:

o Displays only the cake names with a “View More” button.
o Lacks additional details such as description, price, or offers, making the content very limited.

3. Navigation:

o Minimal navigation with only icons (user profile and cart).
o Absence of text labels or menu options reduces clarity for first-time users.

4. Purpose:

o Appears to be designed mainly for basic product browsing.
o Prioritizes visual appearance over usability and detailed user information.

GOOD WEBSITE

1. Design Style:

o Elegant and visually rich layout designed specifically for mobile screens.
o Each screen highlights a single cake flavor with matching background colors and themed visuals.
o Creates a premium and luxurious feel using balanced colors and decorative elements.

2. Content:

o Includes attractive headings and detailed descriptions for each cake.
o Emphasizes indulgence, celebration, and emotional appeal to engage users.

3. Navigation:

o Simple and intuitive vertical scrolling layout suitable for mobile users.
o Clear call-to-action button (“Enjoy Now”) improves user interaction.

4. Purpose:

o Focuses on branding and creating an immersive user experience.
o Designed to emotionally connect with users and promote premium cakes.

Key Differences:

• **Focus:** The bad website is product-centric with minimal information, while the good website emphasizes storytelling and user experience.

• **Design Aesthetics:** The bad website uses strong contrasting colors and a rigid layout, whereas the good website is visually balanced, themed, and elegant.

• **Content Depth:** The good website provides descriptive and engaging content, while the bad website keeps information minimal.

• **Target Audience:** The bad website suits basic browsing, whereas the good website targets users looking for a premium and engaging bakery experience.
